

Logistics Location Correction Report

Yannis EOSE — 23 July 2026 — Prepared by Engineering

What happened: Between 23 May and 22 July 2026, a system error caused some orders to show the wrong delivery agent/location after they were assigned. The orders were delivered by the correct agents, but the records showed a different location.

Impact: Remittance reports and agent performance tracking showed incorrect location attributions for the affected orders.

Resolution: All affected orders have been identified and corrected using the system's audit trail. The error has been fixed and cannot recur.

How to read this report: "Wrong Location" is what the system incorrectly showed. "Correct Location" is the agent/location that was originally assigned and actually handled the delivery. All orders now show the correct location.

Section A: Orders Corrected Automatically (59 orders)

These orders had their location restored to the last agent assignment using the audit trail.

#	Order	Customer	Status	Wrong Location	Wrong Provider	→	Correct Location	Correct Provider	Delivered
1	YNS-62473	Owem Bashy	DELIVERED	lagos	Fomax logistics	→	Porthacourt	Fomax	21 Jul 2026

Section B: Orders Previously Corrected by Support (29 orders)

These were manually corrected before the automated fix. The "Agege" entries were the most visible because that location is new and clearly incorrect for non-Lagos deliveries.

#	Order	Customer	Status	Was Incorrectly Showing	→	Corrected To	Provider	Delivered
